PROFILE

Frontend developer and UX designer in Copenhagen, working end to end from Figma to shipped React/Next.js. I'm at my best making complex, data-heavy systems feel simple — AI assistants, sustainability and fintech SaaS, and a recycling app I co-founded. A background in music and social science sits underneath it; the constant question is how people actually use what we build. Most drawn to products that help people or the planet.

EXPERIENCE

Genbrugsguiden — Co-founder · Product & Frontend Lead

Copenhagen · Part-time · Jun 2025 – Present · [FRONTEND](#) [UX DESIGN](#) [PRODUCT DESIGN](#)

- Co-founded a Danish recycling app, now in pilot with Gentofte Kommune: photo-based waste recognition that identifies an item and routes it to the correct fraction, container, and disposal location.
- Own brand, UX, and frontend end to end (Next.js, Tailwind) — visual identity, colour system, website, and the worker app, built from scratch. Building integration with municipal services.
- Grounded in field research at recycling stations: designed and shipped the core interaction to work one-handed, in seconds, and readable outdoors.

Layerise — UX Designer & Frontend Developer

Copenhagen · Full-time · May 2025 – Oct 2025 · [UX DESIGN](#) [FRONTEND](#) [GRAPHIC DESIGN](#)

- Designed the UX and built frontend for Layerise's AI product assistant: search, generative answers, follow-up prompts, product context, and handoff to human support.
- Designed the product logic underneath — multi-owner serial numbers, warranty and eligibility rules, age-gated registration — turning complex business rules into clear, buildable flows.
- Took the marketing site end to end (UX, frontend, graphic design), on a platform used by brands including Moncler, Smeg, Nidecker, and BeSafe.

Enablment (now Loyal) — Frontend Developer & UX Designer

Copenhagen · Full-time · May 2023 – May 2025 · [FRONTEND](#) [UX DESIGN](#) [FULL-STACK](#)

- Modstrøm (CO₂-tracking SaaS) — sole designer and frontend developer, end to end: designed every flow in Figma and built it in Next.js/TypeScript — auth, CRUD, API integrations, dynamic forms, reporting, PDF generation.
- Collaboration (internal PM + time-tracking) — lead designer and frontend on a tool used company-wide: dashboards, time tracking, client and user management, reporting with data visualisation.
- Frontend developer on client products across fintech, mental health, hospitality, and video/subscription: Klaret (React Native), B:A:M Universe, MindMyMind, Broløkke, ENORRA.

Freelance — Identity, Web & Design

Copenhagen · 2024 – Present ·

GRAPHIC DESIGN

FRONTEND

— Selected commissions: Black Swan Institute (visual direction for an advisory firm working with Danish public institutions — tax authority, ministries, municipalities), Trekanten (fencing-club identity), a digital library card for a Warsaw high school, Studio 1506 (interior-architecture site).

Motionshift — Frontend Developer

Copenhagen · Full-time · Aug 2022 – Apr 2023 ·

FRONTEND

— Built Facebook, Instagram, and Pinterest API integrations powering ad search inside an AI-driven video and ad editor (Next.js, TypeScript).

Auctionet — Full-stack Developer

Remote · Full-time · Dec 2021 – Jul 2022 ·

FULL-STACK

— Full-stack on an auction platform for European auction houses — React + Ruby on Rails, bidding and item flows, i18n across markets.

Earlier — 2021 (internships)

— Twentyfour — Junior Web Developer: custom WordPress builds across industries.

— Bomae — Software Developer: internal tools (Rails + React) for a real-estate buyer-advisory firm.

SKILLS

Core **React, Next.js, TypeScript, JavaScript, Tailwind, Figma, design systems, UX/UI design**

Also GraphQL, Node.js, React Native, REST, Firebase, SQL, Git, Vercel

Familiar Ruby on Rails, WordPress, Webflow, Framer

EDUCATION

Full-stack developer bootcamp, Le Wagon — 2020

Digital marketing + Google Analytics, KPI Communications — 2020

MA, Rhythmic Music Conservatory (RMC), Copenhagen — 2017

BA Sociology, Tischner European University, Kraków — 2006
